WORK HISTORY

02/2020 to Current **Personal Projects**

As COVID-19 hit the world so some effects on me too. I started doing my personal project.

1- Travel Mate: Its open source project with the notes for the newbies to learn about react ways whoever want to jump from conventional jQuery to react can get the useful tricks from this project proper readme is there to help Git Repo

2- Our heroes: Kind of project to keep a soul motivated. Friend of mine working on me on this that is why repo is private

In both of the project MERN stack is showcased.

03/2017 to 02/2020 **Team Lead**

AWOK.com – Jumeirah Lake Towers, Dubai

As a team lead of App Department, my responsibilities are to set sprint base target for my team. Discussing and having weekly meeting sessions to tackle latest challenges. Other responsibilities include.

-Manage and update Checkout section.

-Manage and update API.

-Implementation of Discount and Pricing module.

-Integrate and update Payment System.
-Implementation of Refund Operations.
Technologies: = PHP (Lumen, Bitrix), JavaScript (Node, React), MySQL, and MongoDB

12/2014 to 03/2017   **Sr. Developer**
AWOK.com – Jumeirah Lakes Tower, Dubai
AWOK.com is a leading e-commerce company in UAE and with a global presence in Pakistan, India, Saudi Arabia and Egypt. Since our inception in 2012, we have gained a strong reputation in UAE. I am involved in analyzing, developing and deploying various aspect of e-commerce application using Bitrix and Laravel as PHP framework.

07/2014 to 10/2014   **Software Engineer**
Invocode Ltd – Lahore, Punjab
Invocode was the prominent name among IT solutions companies in Lahore. I was the part of stealth genie project. Laravel framework used for the backend. As a part of the team, I was involved in analyzing the requirements and implementing core logic of the project.
Technologies worked with Laravel, JQuery, JavaScript, HTML, and CSS

12/2012 to 07/2014   **PHP Developer**
Horizon Technologies – Lahore, Pakistan
- As a team member, my responsibilities was to work with team of App developers and front-end developers.
- In most of the projects, Codeigniter was used to make both JSON and SOAP web services. And jQuery for the frontend.
- My journey as a professional web developer started from here.
- Technologies I worked in was JavaScript, JQuery, Codeigniter as PHP framework.
- Main projects Pushpedalpull.com
